What is Online Reputation Management

Online reputation management (ORM) means taking control of online conversation.

ORM are techniques and strategies to ensure that people find the right materials when they look for you on the Internet.

Purpose of ORM

The purpose of online reputation management is to create **balance**, counteract misleading trends, and allow you to put your best foot forward.

The meeting interface includes a "REC" indicator, a "Yash Khatri is presenting" notification, and a grid of participant avatars. The bottom of the screen shows the Windows taskbar with various application icons and the system tray displaying the time as 12:37 PM on 7/17/2021.

Platforms To Build Your Online Reputation

The Key to Online Reputation Management: Listen To What People Are Saying About Your Brand

Your online reputation is forever

If someone writes something negative about you online, it can put you at a serious disadvantage over the long term—especially if you're not aware of it. You might never know why you didn't get that apartment you wanted, or why a job offer never materialized after that phenomenal interview.

I'm a quality management professional and always felt that I lacked the confidence and stage daring required for my profession. At DMI I was motivated to participate and lead programs through which I could conquer my stage fear. This has helped me in my Business Venture which I recently started. DMI has certainly made me into a smart professional which I always wanted to become! I will always be indebted to the institution for moulding me in this nice way!
